## PROJECTS: (ordered most to least recent)

---

### [jendu.github.io](https://jendu.github.io) - [Link](#) - [GitHub](#)

Jul 2020 - Present

My personal website designed from scratch using responsive web design. Source code available on GitHub.  
> *Skills: JavaScript, HTML/CSS, Atom, GitHub.*

### Emoji Translator - [GitHub](#)

Nov 2019 - May 2020

Individual final year project for university to create an emoji translator app centralised on UI accessibility. Presented my project to the director of Dyslexia Institute UK. Source code available on GitHub.  
> *Skills: JavaScript, jQuery, Python, HTML/CSS, Chrome API, Atom, GitHub.*

### EventLite

Jan 2019 - May 2019

University group project to develop an event management app using the Spring RESTful framework. This included developing from a skeleton to a minimum viable product, implementing additional features as necessary.  
> *Skills: Java, JavaScript, HTML/CSS, Mapbox API, Twitter API, Spring, TDD, MVC, JUnit, Eclipse, GitLab.*

### Stendhal

Sept 2018 - Dec 2018

University group project to develop an existing open-source Java game. This included debugging, implementing new features and extending the code-base. Test-driven development was practiced using JUnit and Jenkins.  
> *Skills: Java, TDD, Jenkins, JUnit, Maven, Eclipse, GitLab.*

### BeeSecure

Nov 2017 - May 2018

University group project to create a personal travel security web app. This involved implementing user accounts, a friending system, and automated notifications to appointed emergency contacts.  
> *Skills: PHP, SQL, JavaScript, HTML/CSS, Google Maps API, Firebase, Bootstrap, Eclipse, GitLab.*

## SKILLS: (ordered most to least proficient)

---

Languages:	Java, HTML/CSS, JavaScript, jQuery, Python, C, MySQL, PHP, $\LaTeX$
Software:	Microsoft Office, Git, IntelliJ IDEA, MATLAB, Atom, Eclipse
Practices:	MVC Architecture, TDD
Operating Systems:	Microsoft Windows, Linux
Miscellaneous:	Touch-typing (avg. 125WPM)
